Case study3: Canary Deployment Using Lambda and API Gateway

STEP 1 : CREATING LAMBDA FUNCTION FOR PROD

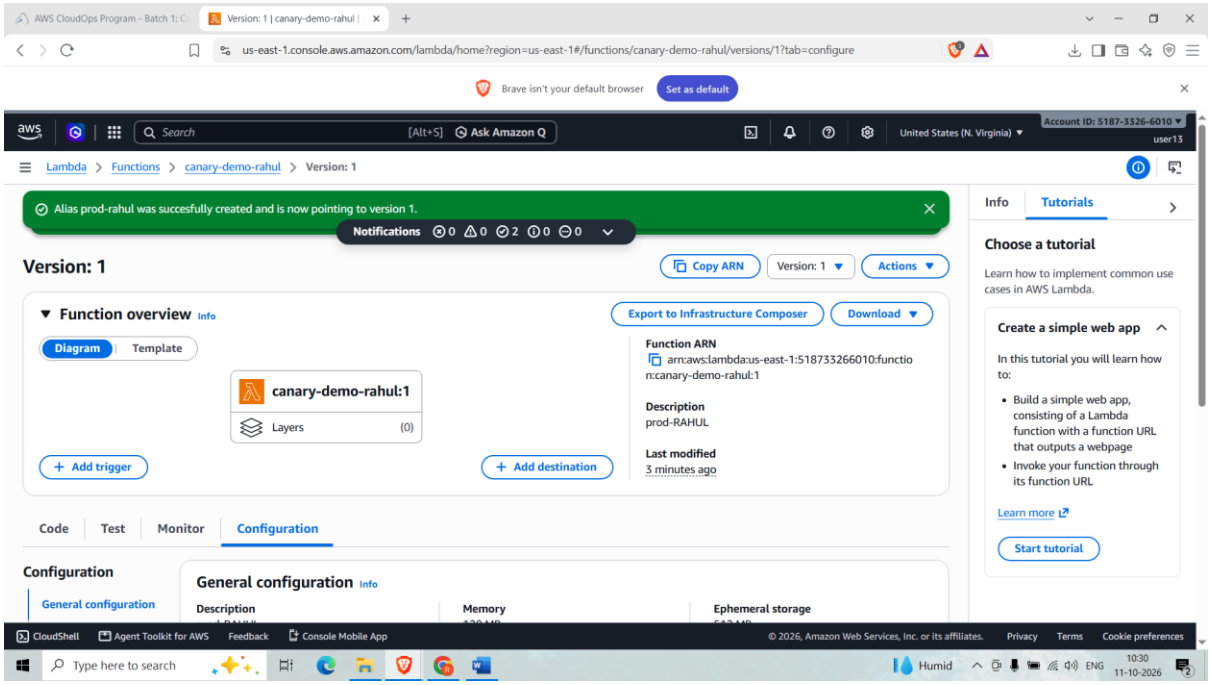

FUNCTION NAME : canary-demo-rahul

STEP1.1 DEPLOYED THE FUNCTION:

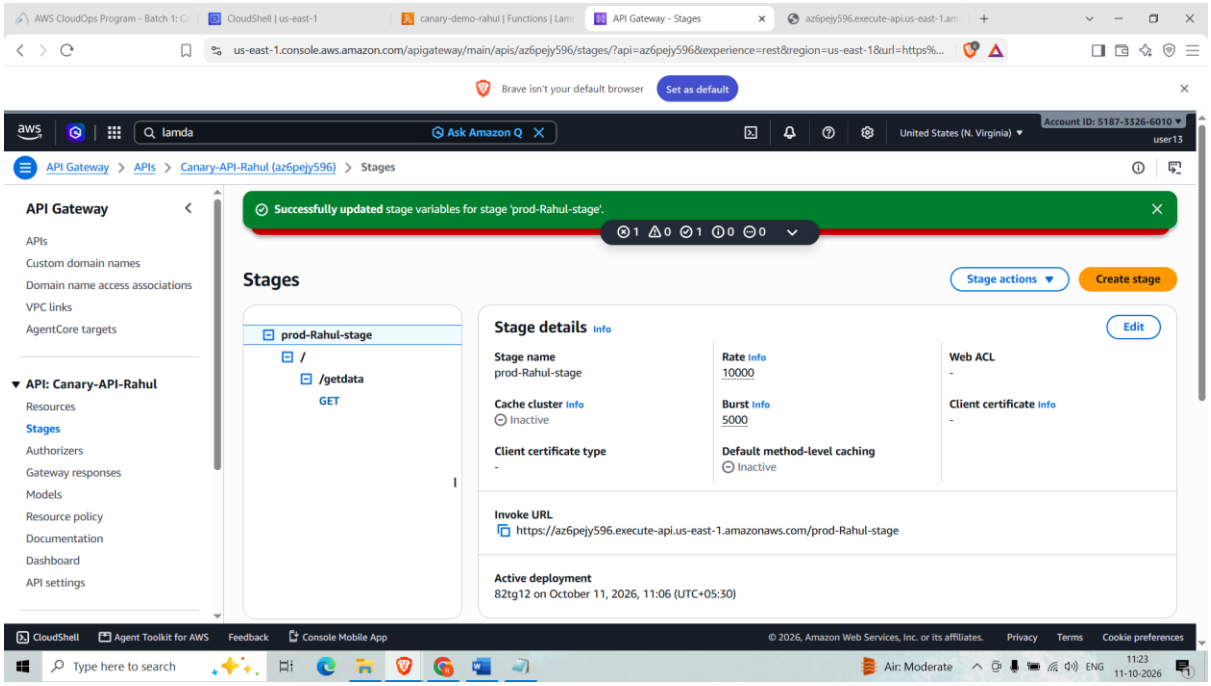

Successfully created lamda version 1

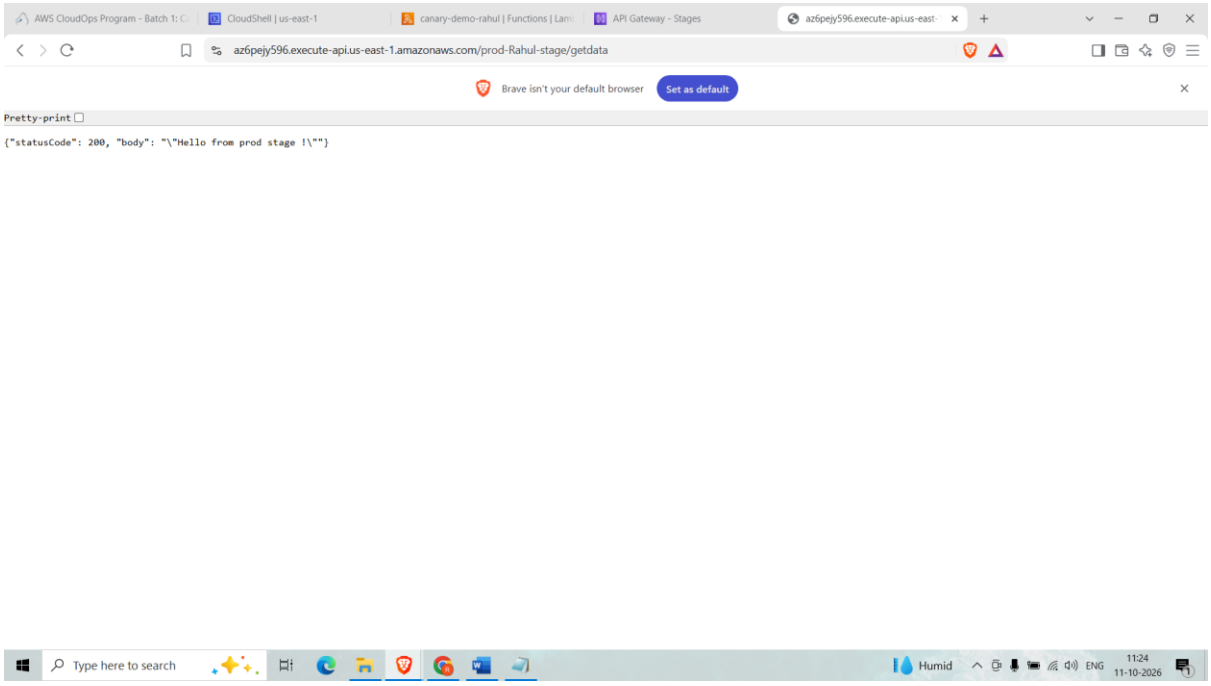

Task 2: Create an API Gateway

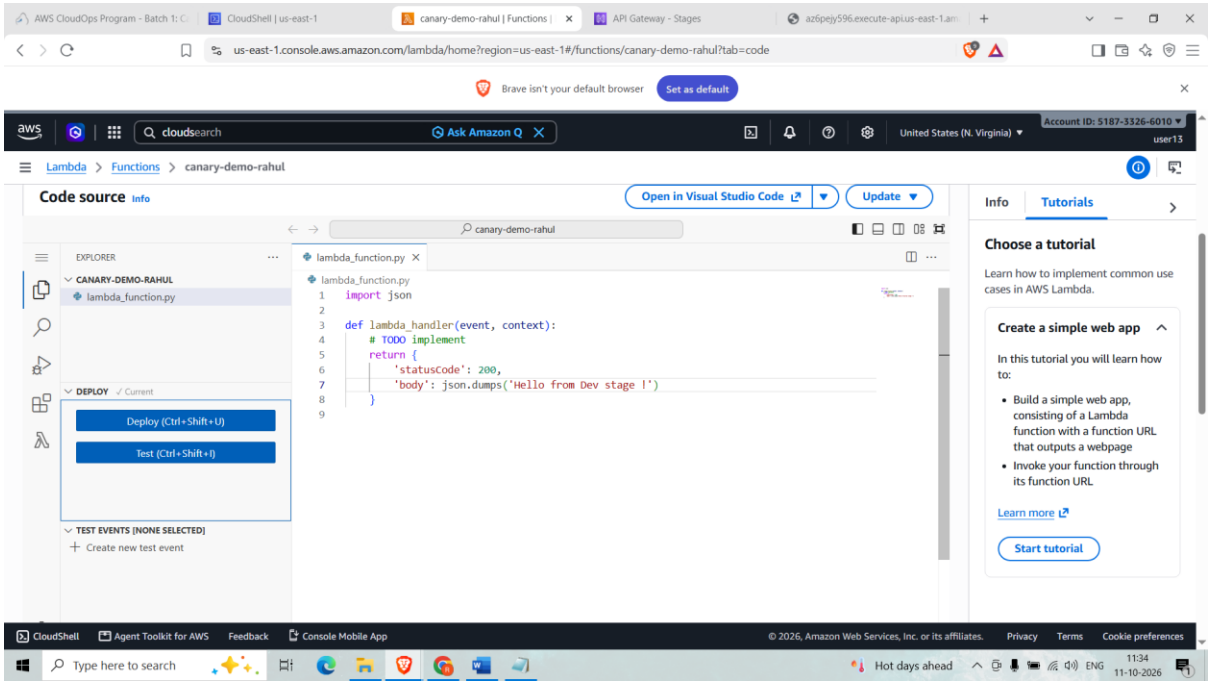

And successfully we are getting the response from lambda on calling the api

OUTPUT:

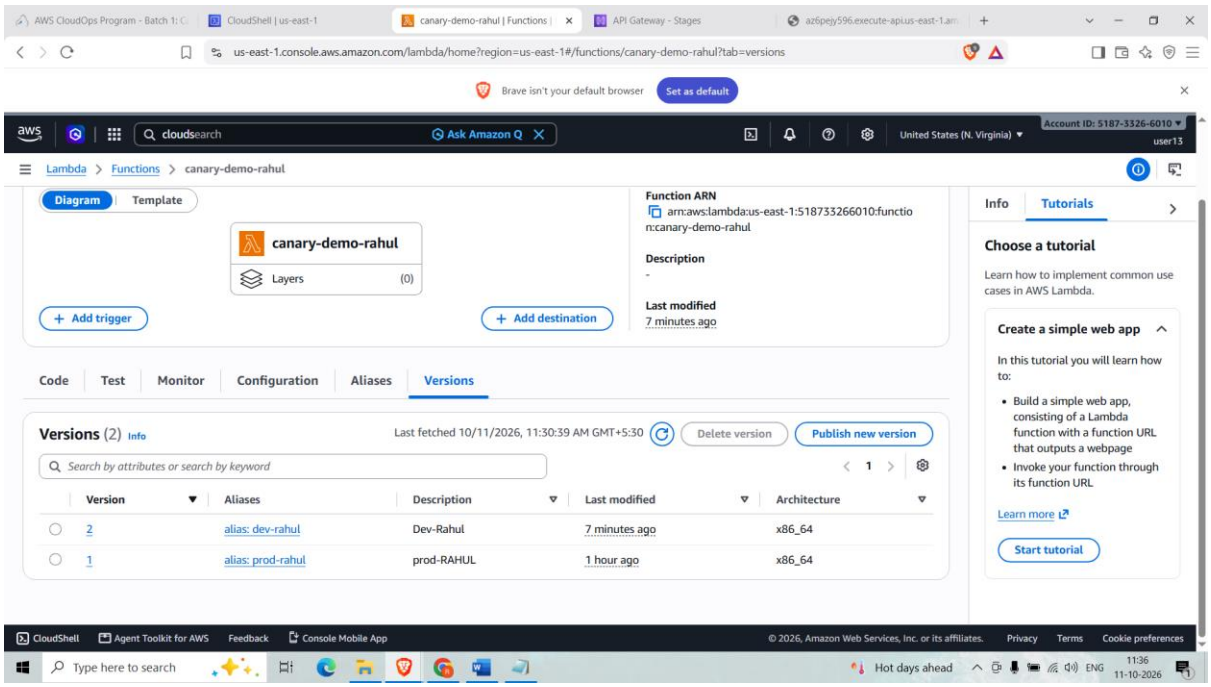

TASK3- CREATING LAMBDA FUNCTION FOR DEV

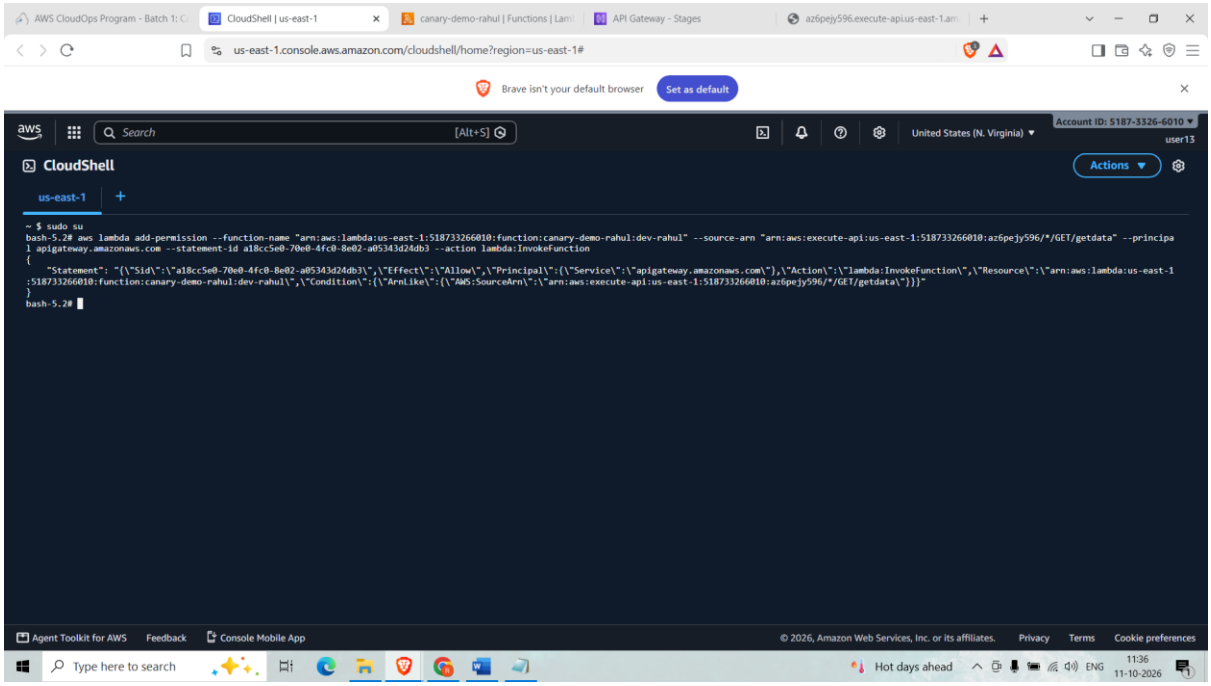

For the dev (version 2) of lamda , following should be the output

Successfully created a new version named dev-rahul

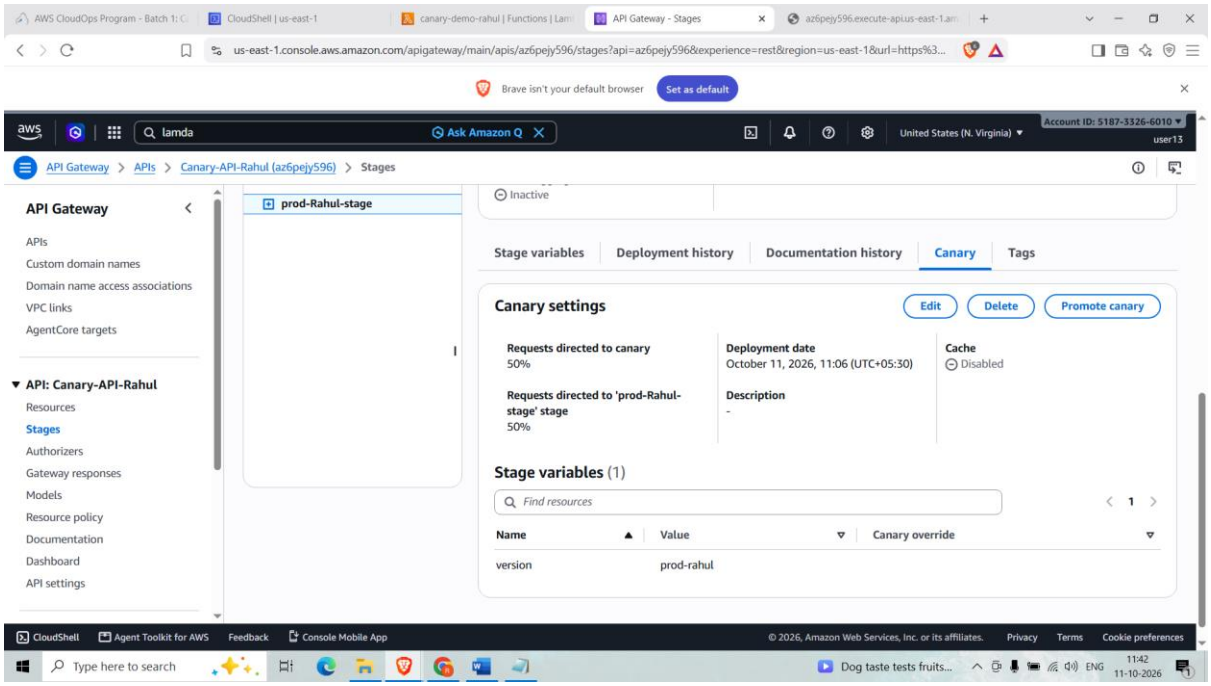

Successfully added permission through cloudshell

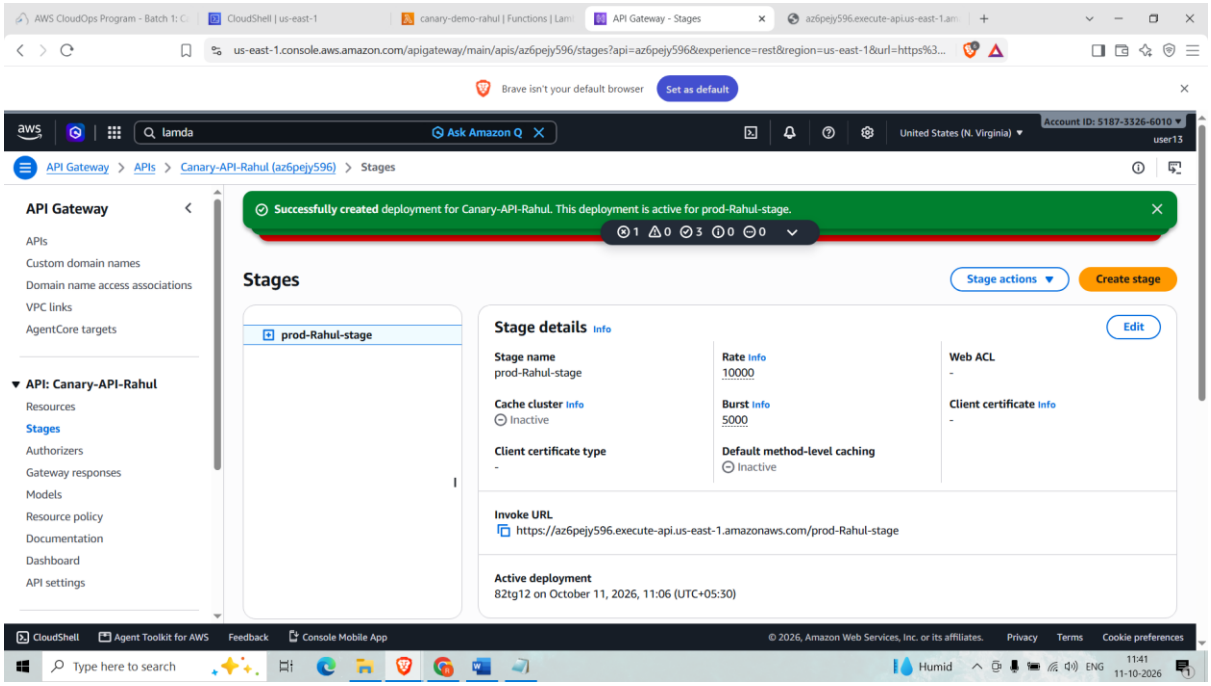

TASK4- CREATING CANARY IN API PROD STAGE

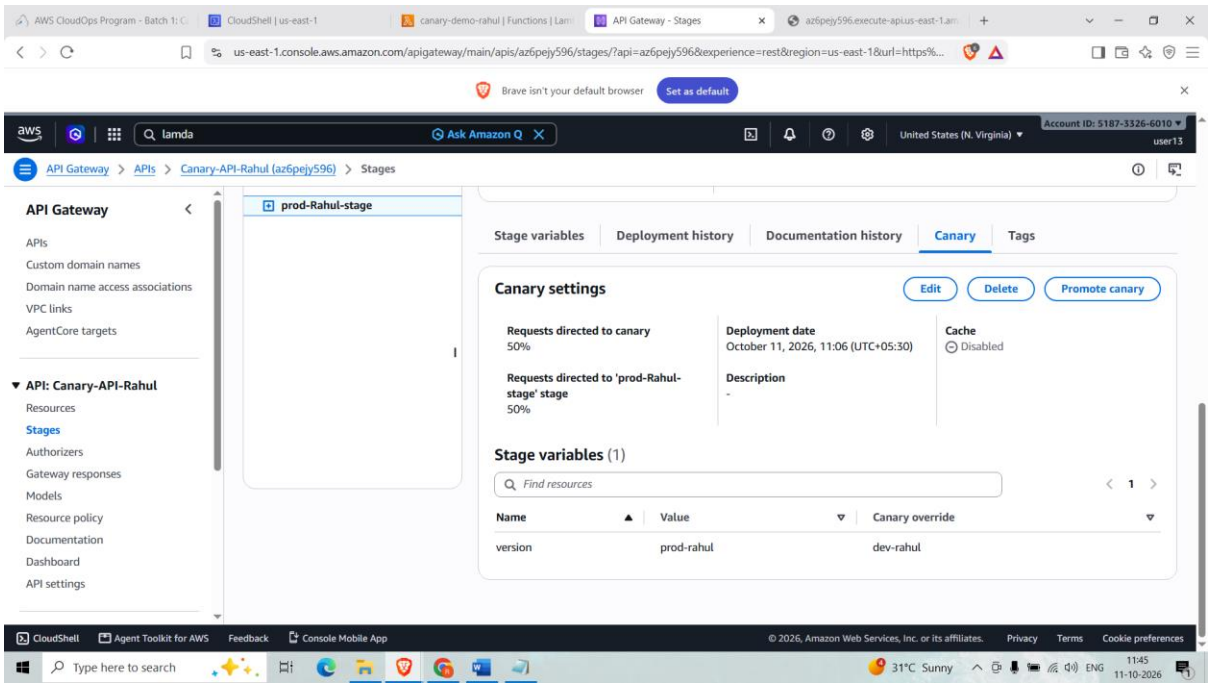

CANARY CREATED

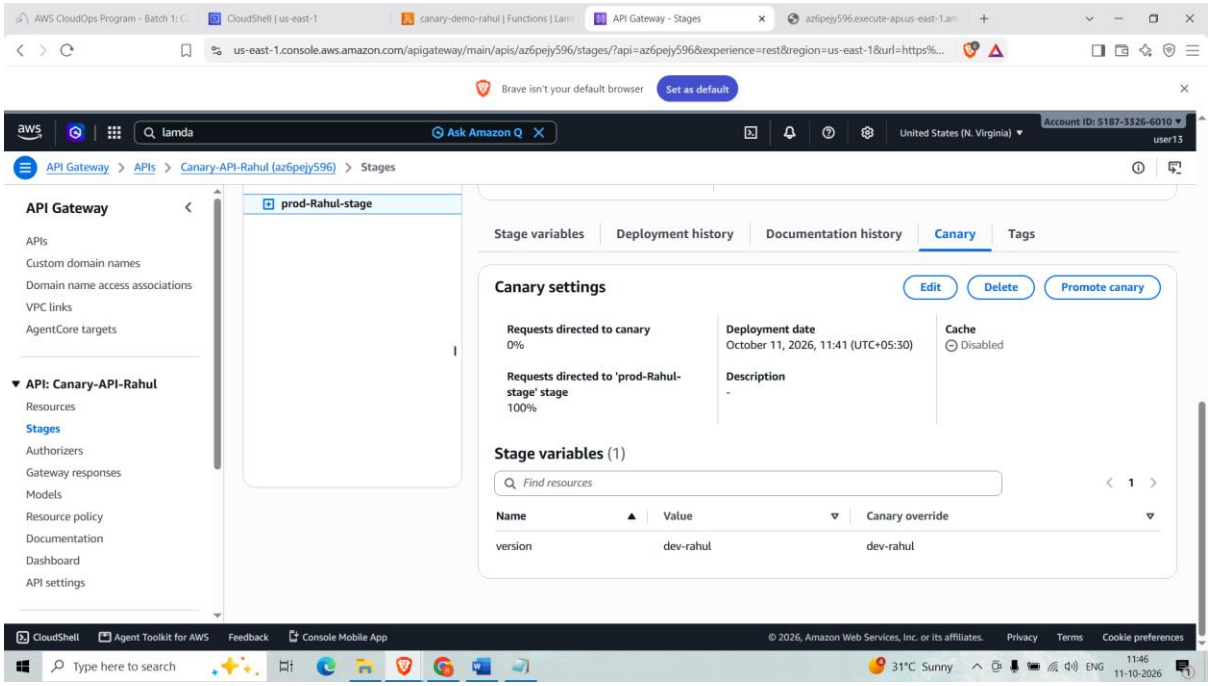

DEPLOYED THE CANARY

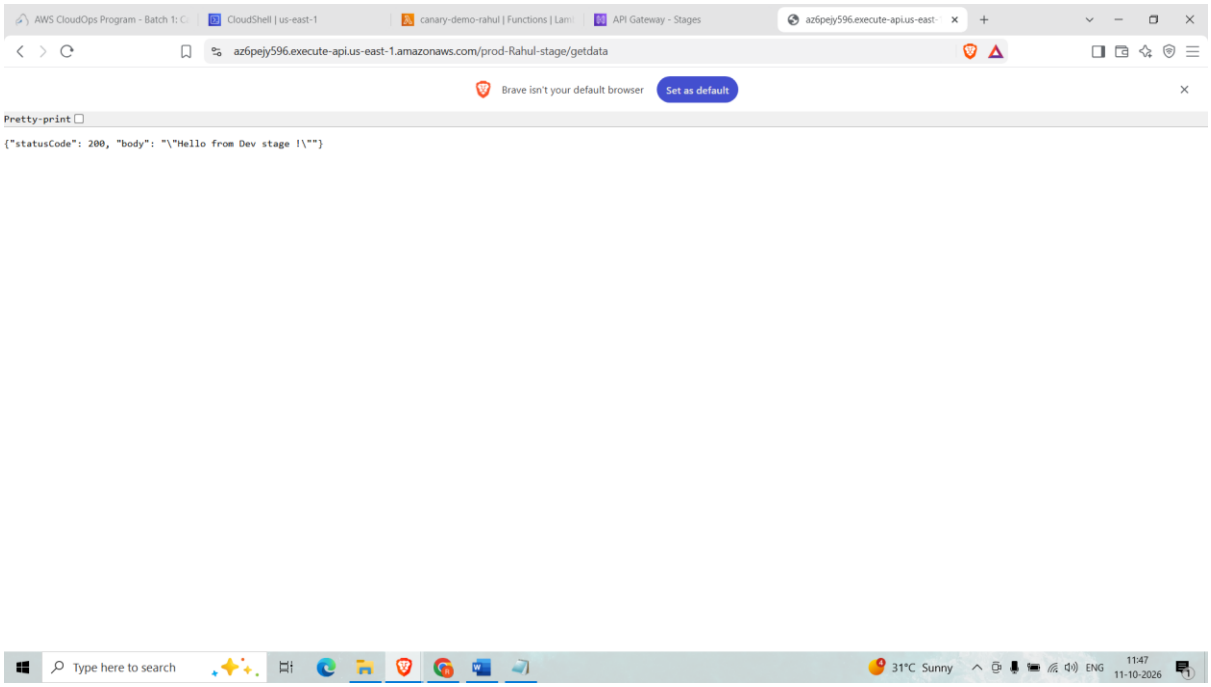

NOW CANARY OVERRIDE DONE WITH 2ND LAMBDA FUNCTION (DEV-RAHUL)

PROMOTED THE CANARY

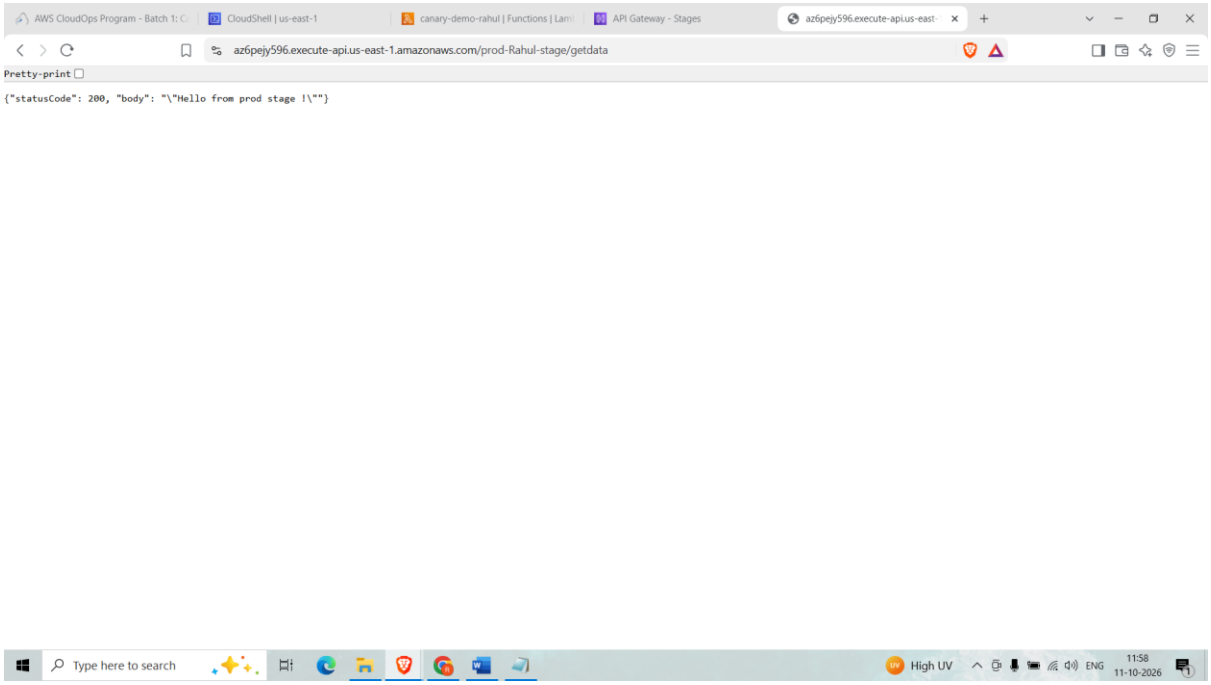

AGAIN HITTING THE API URL TO GET THE 2ND LAMBDA FUNCTION(DEV-RAHUL)

SUCCESSFUL AND GOT THE REQUIRED OUTPUT

Sometimes refreshing we getting this-PROD

And sometimes – DEV
